SUMMARY

UX/UI Designer and Business Analyst with over 2 years of experience in enterprise ERP and financial software. Experienced in managing products from start to finish, from gathering client requirements and creating UML workflows to designing intuitive user interfaces. Highly skilled in using AI tools like Claude Code to generate functional UI screens, and managing database tables in DBeaver to ensure the final product matches design specifications perfectly.

WORK EXPERIENCE

UX/UI Designer & Business Analyst | GEN SOFT CO., LTD. **Oct 2024 - Present**

- Designed a mobile app feature for a complex Beneficiary Designation Request by turning paper forms and client rules into simple digital steps for users.
- Collected business requirements directly from clients and designed the entire Meeting Management system, turning operational workflows into clear UML diagrams and layouts
- Managed the full delivery of UI screens and features for E-Correspondence, Debt Tracking, and Legal Case Management systems, using Claude Code to generate 100% of the C# and .NET Blazor code to match design specifications.
- Created new database tables in DBeaver and directed AI backend logic by defining data sources, ensuring the final software functions correctly and connects smoothly with the user interface.
- Tested systems with users on-site (UAT) and presented the finished software to clients for final approval, while organizing user feedback into a development list and helping design interns.

UX/UI Designer & Project Manager | Relearn Solution **Apr 2024 - Sep 2024**

- Designed a multi-subject assessment portal and landing page for students, optimizing the UI for a stress-free testing experience across all devices.
- Managed the full design lifecycle and acted as the primary liaison between design and development teams to ensure on-time delivery.
- Recognized for high accountability and performance, leading to a direct referral to GEN SOFT.

PERSONAL PROJECTS

Internal HRM Time Attendance App (Vibe Coding) **Feb 2026 - Mar 2026**

- Developed a full-stack Clock-in/out system using Next.js, TypeScript, and Prisma through AI prompt engineering to rapidly deliver a functional enterprise tool.
- Directed 100% of the development process using AI to manage system logic and code, from Database Schema design to UI implementation, proving efficiency in AI-led problem solving.

EDUCATION

Bachelor's degree, Digital Media Engineering **May 2019 - Dec 2023**

Khon Kaen University, Khon Kaen, Thailand

ADDITIONAL INFORMATION

- Design:** Figma, Wireframing, Prototyping, Design Systems, Responsive Web & Mobile Design, User Journeys, Competitor Analysis
- Analysis & Data:** Business Analysis, Requirement Gathering, UML Diagramming, SQL, Python, R (ggplot2), User Research, Usability Testing, UAT
- UX Engineering & Tech Tools:** Claude Code, Gemini CLI, C#, .NET, Blazor, EF Core, DBeaver, VS Code, Next.js, TypeScript, Prisma, HTML5, CSS, Jira
- Languages:** Thai (Native), English
